

IT ASSET DISPOSITION (ITAD) SERVICES

RETIRE TECHNOLOGY. RECOVER VALUE. STAY COMPLIANT.

When technology reaches end of life, the risk doesn't end — it shifts. Payment devices hold encryption keys. POS systems store transaction data. Every retired asset is a potential compliance exposure until it's properly sanitized and documented. NewBold manages the full disposition lifecycle: secure collection, certified data destruction, environmentally responsible recycling, and value recovery — with complete chain-of-custody documentation from your location to final processing.

WHY NEWBOLD FOR ITAD?

**Payment Device
Expertise:**

Most ITAD vendors handle general IT equipment. NewBold operates a PCI-certified facility and understands encryption key destruction for payment terminals — not just hard drives

**Already in Your
Locations:**

If NewBold manages your deployments or break/fix, disposition is a seamless extension of the refresh. No separate vendor, no gap in the chain of custody

Full Chain-of-Custody:

Every asset tracked from site pickup through data destruction and final disposition. Serialized documentation and certificates of destruction

Value Recovery:

Devices with remaining useful life can be refurbished and resold or redeployed. NewBold assesses every asset and returns value where possible

**Environmental
Responsibility:**

Recycling through certified processing partners. Detailed environmental reporting for your ESG and sustainability programs

National Scale:

Collect from one location or one thousand. Consistent processes and documentation across all 50 states and Canada

SECURE COLLECTION & LOGISTICS

- Onsite de-installation by NewBold technicians during refresh projects
- Standalone collection programs for bulk retirement events
- Secure packaging, labeling, and transport to NewBold depot
- Serialized asset tracking from site pickup to depot receipt
- National coverage across all 50 states and Canada

DATA DESTRUCTION & SANITIZATION

- NIST 800-88 compliant data sanitization methods
- Physical destruction for devices requiring it (payment terminals, drives)
- PCI-specific destruction protocols for encryption keys and payment data
- Individual certificates of destruction per asset
- Audit-ready documentation and reporting

VALUE RECOVERY & REMARKETING

- Assessment of every asset for remaining useful life
- Refurbishment and remarketing of viable equipment
- Internal redeployment support for assets with remaining value
- Transparent value recovery reporting
- Revenue share or cost offset against disposition fees

RECYCLING & ENVIRONMENTAL COMPLIANCE

- Certified recycling partners for responsible processing
- Zero landfill commitment for electronic waste
- Detailed environmental impact reporting
- Compliance with state and federal e-waste regulations
- ESG and sustainability documentation for corporate reporting

EVERY ASSET ACCOUNTED-FOR. EVERY STEP DOCUMENTED.

ASSET TYPES WE DISPOSITION

- POS systems, registers, and peripherals
- Payment terminals (PCI-scoped data destruction)
- Servers, UPS systems, and networking equipment
- AIDC devices — scanners, printers, mobile computers
- Digital signage, kiosks, and back-office systems

WHO THIS IS FOR

- IT leaders managing fleet-wide refresh programs
- Compliance and risk officers ensuring PCI and data security
- Finance teams seeking cost recovery from retired assets
- Sustainability and ESG leaders tracking environmental impact
- Operations teams coordinating multi-site retirements

RETIRING TECHNOLOGY? LET'S MAKE IT SIMPLE & COMPLIANT.

Let's discuss how NewBold can manage your IT asset disposition protecting your data, recovering value, and keeping you compliant.
