

## NEWBOLD KEY INJECTION & PAYMENT DEVICE SERVICES

### PCI-CERTIFIED PAYMENT SECURITY

End-to-end payment device procurement, encryption, configuration, and fulfilment from our in-house PCI-certified Key Injection Facility. No external vendors. No compliance gaps.

One trusted partner for your entire payment device supply chain.

### WHY LEADING BRANDS TRUST NEWBOLD

**140,000**

Devices  
Processed  
Annually

**300+**

Encryption  
Keys in  
Library

**PCI**

Certified  
KIF

**Same-Day**

Fulfilment  
Capability

### WHAT MAKES NEWBOLD DIFFERENT?

**Vertical Integration:** We own our PCI-certified KIF - encryption, compliance, and configuration are handled in-house. No external vendors, no compliance gaps, no dependencies

**Complete Supply Chain:** From device procurement and inventory management through key injection, software loading, staging, kitting, and fulfilment — one partner owns the entire process

**Universal Compatibility:** 300+ Encryption keys in our library supporting every major payment processor and gateway — we have you covered

**Speed to Deploy:** In-house inventory of high-demand devices with same-day fulfilment capability. No back orders, no delays — devices ship when you need them

**Full Chain-of-Custody:** Every device is tracked from receipt through configuration, testing, and shipment. Complete auditability for PCI compliance and security requirements

**Lifecycle Continuity:** The same team that configures your payment devices also supports them day-to-day, manages advanced exchanges, and plans refresh cycles when it's time to upgrade

## DEVICE PROCUREMENT & INVENTORY

- Source and stock high-demand payment terminals and PIN pads from major OEMs
- In-house inventory eliminates backorder delays
- Volume purchasing and distribution capabilities
