

NEW OPENINGS & REMODEL SERVICES

OPEN FASTER. OPEN CONSISTENTLY. OPEN RIGHT.

Every new location is a deadline. NewBold manages the entire technology scope — procurement, staging, structured cabling, device installation, configuration, testing, and cutover — so your stores and restaurants open on time with every system operational. From a single flagship to a hundred-unit franchise expansion, one partner owns the technology build-out from plan to go-live.

WHAT MAKES NEWBOLD DIFFERENT?

Store in a Box:	Pre-configured technology kits staged at our depot and shipped ready to install. Same configuration templates at every location — whether it's store one or store one hundred
One Partner, Full Tech-stack:	POS, payment, networking, cabling, signage, kiosks, KDS, drive-thru, and security. One team owns every component — no coordinating six vendors
Low-voltage Permit Capability:	NewBold holds LV permits and manages the permitting process. One less contractor, one less delay
Franchise & Multi-site Ready:	We coordinate across franchisees, landlords, GCs, and local authorities to keep your opening timeline on track
Seamless hand-off to Support:	The team that installs your technology supports it from day one. Help desk, break/fix, and managed services — no new vendor after go-live
National Reach:	NewBold-Certified Technicians across all 50 states and Canada. Open in any market without sourcing local contractors

PLANNING & SITE READINESS

- Technology scope definition aligned to brand standards
- Site surveys and infrastructure readiness assessments
- Low-voltage permit coordination where required
- General Contractor, landlord, and franchisee scheduling coordination
- Risk identification and timeline management

PROCUREMENT, STAGING & KITTING

- Central procurement from OEM and distribution partners
- Device imaging, configuration, and application loading
- Store-in-a-Box kitting with all hardware and accessories
- Serialized asset tracking from depot to site
- Buffer stock for high-volume opening programs

INSTALLATION & GO-LIVE

- Structured cabling and low-voltage infrastructure
- POS, payment, networking, signage, and peripheral installation
- System configuration, integration testing, and cutover
- Coordination with General Contractor schedules and construction milestones
- Punch list resolution and sign-off documentation

DAY-ONE SUPPORT & BEYOND

- Immediate access to 24/7 help desk and field dispatch
- Advanced exchange and depot services from go-live
- Tiered managed services matched to device criticality
- Ongoing break/fix, monitoring, and lifecycle management
- Same team from installation through ongoing support

BUILT FOR YOUR VERTICAL

QSR & RESTAURANTS

New Restaurant Openings • Remodels • Franchise Expansion

- POS systems, KDS, drive-thru technology, self-service kiosks, and digital menu boards
- Payment device deployment through PCI-certified Key Injection Facility
- Franchise coordination across corporate-owned and franchisee locations
- Drive-thru and line-busting technology installation and integration
- Speed-of-service technology configuration and testing

RETAIL

New Store Openings • Remodels • Concept Rollouts

- POS systems, mobile POS, inventory management, and loss prevention technology
- Digital signage, AV systems, and in-store experience technology
- Omnichannel enablement — BOPIS, ship-from-store, endless aisle
- Store-in-a-Box standardization across multi-location rollouts
- Security infrastructure, structured cabling, and networking

OPENING NEW LOCATIONS? LET'S TALK.

Let's discuss how NewBold can get your next location open on time, on standard, and ready for business
